

## USDF TestPro

TestPro is the only dressage test learning app in the world to make learning your tests interactive and learnable through a mobile device.

The app caters for all learning styles; visual, audio and kinaesthetic. Using a finger on a phone or ipad touch screen you can draw a test movement by movement, . By tapping on the screen, TestPro will draw each movement, or you can watch the test play from start to finish. There is a function to have the test read to you, either through headphones or loudspeaker. All functions can be paused, rewind or fast forwarded so you can begin learning the test at any movement.

New for 2025 is the Caller feature so you can ride with your phone in your pocket or put it on the fence and pop in some AirPods and then voice command TestPro using keywords such as Next, Back and Repeat to hear the test instructions.

There is a free trial available on the app store allowing use for a limited time period after which the app works on a subscription basis from \$3.99 a month.

TestPro is also available with tests from British Dressage, United States Eventing association, British Eventing, Dressage Ireland and FEI.
